EMPLOYMENT HISTORY

Co-Founded Follege
January 2020 — July 2020

- Worked with the Tech-team on the active Website as well as the Pilot and Beta version of our App, we used React Native, NodeJs & Mongo .
- Designed initial UI of our Pilot and Beta App version.
- Worked on the marketing front as well, onboarded more than 7k+ Students on Follege Social Communities.
- Also occasionally hosted Webinar/Virtual Workshops with micro-influencers and industry.

Web-Development internship at IIT-Bombay
September 2021 — Now

- Working on developing a platform to document and store possibly all details of temples across Bharatvarsha (India), mentored by Prof. Ganesh Ramakrishnan of IIT-Bombay under the Dharmawiki project.
- Integrating a real time location of Temples across India with Leaflet and MapBox as well as storing all the details in PostgreSQL database.

★ PERSONAL PROJECTS

Airbnb Clone
August 2021
Tech Stack: NextJS, Tailwind and MapBox.
Created an Airbnb clone with NextJS, Tailwind and MapBox. learnt about Static Site Generation and Server Side Rendering as well as Image Component and Image Optimization with NextJs, also implemented MapBox with Mapbox GL JS and deployed with Vercel.

Slack Clone
June 2021 — July 2021
Tech Stack: ReactJS, Redux, Firebase and Semantic UI React
Created full-stack app with React, Redux and Firebase, among other tools in the React ecosystem. Integrated Redux and Firebase with React using straightforward, practical patterns. Learnt every major part of Firebase-- the real-time database, storage, rules, listeners and deployment with Firebase tools.

Discord-Bot
July 2021
Tech Stack: Node JS , Discord JS Framework and Tenor API
Created a Discord-Bot using NodeJS (JavaScript), which performs features like Assigning Roles by reacting with specified emojis, Kicking and Banning users, Annoucements, custom greetings & sharing gifs by commands.

DevConnector
March 2021 — April 2021
Tech Stack: ReactJS, Redux, MongoDB, Node JS, Express JS and Material UI
Created a full stack social network app with React, Redux, Node, Express & MongoDB. Created an extensive backend API with Express, Implemented Stateless. JWT authentication practices and used React Hooks, Async/Await & modern practices. Deployed the app to Heroku with a postbuild script.
